TERMS OF REFERENCE

TERMS OF REFERENCE FOR BUILDING PLANS INFORMATION SYSTEM

NAME OF THE PROJECT: BUILDING PLANS INFORMATION MANAGEMENT SYSTEM

1. INTRODUCTION

UBuhlebezwe Municipality is looking to acquire the services of a reputable service provider for the supply, delivery, installation and configuration of a Building Plans Information Management System.

2. BACKGROUND

In respect of Section 2 (4) of the National Building Regulation & Building Standard Act, No 103 of 1977, any building to be erected by or on behalf of the State, such plans, specifications and certificate as may be prescribed by national building regulations, shall before the commencement of such erection be lodged with the local authority in question for its information and comment.

Local municipalities across the country have numerous copies of building plans at their disposal and management of these plans has become a challenge. Old building plans are fading and in a poor physical state. The National Building Plan Regulation Act states that the plan once submitted needs to be commented on, approved or refused within a 30-day period. The effective implementation of a building plan management software solution will facilitate these regulations whilst also maintaining proper archives of past plans such that in the event of plan applications being misplaced, the filing application can be completely recreated in a physical form.

The need for electronic filing and management system is further strengthened by the introduction of the MPRA Act where land properties and structures built thereon within local municipalities are required to be rated by municipalities as another source of municipal revenue. With the electronic filing and management system, municipalities are able to scan and associate electronic building plans to land parcels in a database environment. Through this process, storage and access to building plans will be controlled more effectively by the relevant authorities.

In recognition of the above needs, COGTA saw a need to fund municipalities on such projects in order to improve upon the undertaking of the building plans approval process.

3. SUMMARY OF THE BUSINESS PLAN

The pilot study, referred to earlier, is the main informant to these terms of reference. The project is envisaged to be a single phased rollout approach.

The outcome of this project will be the rollout of the pilot Building Plans Information management system at UBuhlebezwe Local Municipality. Procurement of the Building Plans Information Management System will allow the effective management and archiving of building plans.

The implementation of this business plan involves the procurement of a Building Plans Information Management System that **must contain** the following eight main modules:

3.1 Building Plan Management: This module will be for the processing of building plans from application to comment, approval or refusal. It will also cater for the plan occupation whereby the approved plan can be sent for rating and eventually closed off and archived on the software system.

3.2 Signage & Billboards: The applications for signage for roads and buildings as well as billboards will be processed accordingly.

3.3 Banners and Flags: The processing of applications for temporary banners and flags can be accommodated.

3.4 Posters: Applications for temporary posters can be processed.

3.5 Demolition: The application for building and structural demolition is also catered for.

3.6 Plan Archiving: Older plans that have not been processed by the software system can now be scanned and uploaded with easy referencing.

3.7 Customer Care: The complaints of illegal buildings by the public can be recorded here. This module is integral because structures are erected illegally, the financial loss of proposed revenue for a municipality can be great.

3.8 Live Chat System: The users of the system will be able to communicate via the application. One on One chat, groups, offline messages as well as message archiving.

4. AIM OF THE PROJECT

The aim of this project is to acquire an electronic building plans filing and document management system that will enable the municipality to process and archive building plans in its possession electronically.

5. OBJECTIVES OF THE PROJECT

The main objective of this project is to develop an electronic filing and management system that is purposely built for handling building plans. This system will enable the municipality to do the following:

- Store newly approved building plans electronically
- Archive existing building plans
- Enable the municipality to track the building plans throughout the various stages of the building plan approval process
- Manage outdoor advertising processes
- Source a system that can be customised to allow the linking of the system to other systems such as the Billing System, web-based GIS etc. in line with MSCOA requirements

The outcome of this project will be the rollout of a pilot Building Plans Information Management System at UBuhlebezwe Local Municipality.

This project seeks to rollout the system framework that is partially in existence, the costs will be in the customisation of the platform to suit the building plan process unique to the UBuhlebezwe Municipality environment. One would assume that software platforms can then be easily implementable at other municipalities. Although this is partially correct, as it can be implemented at other municipalities, a great deal of customisation is necessary for the software to work in any municipality. The software has to be customised due the varying capacities of municipalities and associated workflows adopted. This will lead to each implementation of the software being totally different to another.

For instance, in a smaller municipality, the staff compliment of the Building Control Department will naturally be smaller. This means that a single person will fulfil multiple roles within the building plan management process e.g. The Building Control Officer (BCO) could assume the role of the BCO, Plans Examiner and Plan Approver. This then affects the workflow process and the system must be configured as such.

On the flip side, a larger municipality will have additional people, so it means that extra customisation is required to cater for a larger distribution. There will be dedicated administration people that service a Department's needs e.g. A Town Planning Department will have an administrator that will direct the plans

to the correct person because the General Administrator circulating to the Town Planning unit initially will not know the correct person in the Planning unit that deals with the Building Plan application.

The required services will include existing system customisation, testing, integration, implementation and knowledge transfer. A software demonstration of the product will be required to assist in the tender award process at the discretion of the Bid Evaluation Committee.

6. SCOPE OF WORK

The service provider will be responsible for:

- Developing a municipal building plans filing and management system for lodging new building plan applications;
- Developing a system with a proven record of successful implementation in at least 2 Municipalities that are based in KwaZulu-Natal;
- Developing a system that has a building plans archiving facility for management of past plans;
- Developing a system which is robust enough to manage applications for signage, banners, posters, billboards, flags and demolition as required by the municipality.
- Developing a Live internal chat system that will allow for effective communication between all registered users on the software system. Create chat groups and archive past conversations as well as see who is online. Leave offline message.
- Integration of GIS to the Building Plan's physical address.
- Building Plans tracking system to see at a glance which stage the plan is at.
- Automatic monitoring of stage time frames with various authority level escalations with time threshold configurations.
- Automatic plans examiner distribution with override and redistribution.
- Plan check in and check out with signature authorization.
- Dynamic document builder for precise document requirement upload.
- Dynamic checklist builder for plan conformity per stage.
- User defined comment builder for easier commenting.
- Centralised document management for easier access to stored information for both viewing and editing.
- Previous stage return.
- Plan occupation stage monitoring from foundation to completion with departmental task allocation and feedback system.
- Cloud ready and web-based system for central installation and storage using web browsers;
- Mail and SMS notification for users and applicants using the system.
- Enhanced security with audit trails for improved management and control of input and stored information.
- User groups for system access parameters.
- Training of the Municipal Building Inspectors, support staff and designated officials on the use of the system. This will include the provision of detailed user manuals.
- Customisation services of the software platform to suit the UBuhlebezwe Municipality Building Plans processing environment.
- Source a system that can be customised to allow the linking of the system to other systems such as the Billing System; web-based GIS etc. in line with MSCOA requirements.

7. IT INFRASTRUCTURE

The Municipality currently operates on a virtualized server infrastructure. One node of the Nutanix cluster is allocated for the Municipal application server which is where the system shall be installed. The application server currently has 1TB free memory which can be increased should the need arise and windows SQL 2016 (It would be advantageous if the system runs on Microsoft SQL Database as the

Municipality only has licensing for SQL but other licensed databases are also welcomed). The system will be installed in-house and the awarded service provider is expected to liaise with the IT unit during implementation of the system, train the unit on system administration and backing up.

8. DELIVERABLES

The project is envisaged to be a single phased rollout approach. The outcome of this project will be the rollout of the pilot Building Plans Information management system.

The implementation of this business plan involves the procurement of a Building Plans Information Management System that must contain the following eight main modules:

- Building Plan Management: This module will be for the processing of building plans from application to comment, approval or refusal. It will also cater for the plan occupation whereby the approved plan can be sent for rating and eventually closed off and archived on the software system.
- Signage & Billboards: The applications for signage for roads and buildings will be processed accordingly.
- Banners and Flags: The processing of applications for temporary banners and flags can be accommodated.
- Posters: Applications for temporary posters can be processed.
- Demolition: The application for building and structural demolition is also catered for.
- Plan Archiving: Older plans that have not been processed by the software system can now be scanned and uploaded with easy referencing.
- Customer Care: The complaints of illegal buildings by the public can be recorded here. This module is integral as if structures are erected illegally, the financial loss of proposed revenue for a municipality can be great.
- Live Chat System: The users of the system will be able to communicate via the application. One on One chat, groups, offline messages as well as message archiving.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

- a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
 - In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

(Bid Number and Description)
